JPMorgan Asset Management (Asia Pacific) Ltd is the Fund's Investment Adviser. Investment in closed-end funds involves risks. Additional risks are associated with international investing, such as currency fluctuation, government regulations, economic changes and differences in liquidity, which may increase the volatility of an investment in the Fund. Foreign securities markets generally exhibit greater price volatility and are less liquid than the U.S. market. Additionally, this Fund focuses its investments in certain geographical regions, thereby increasing its vulnerability to developments in that region. All of these factors potentially subject the Fund's shares to greater price volatility. The NAV of the Fund will fluctuate with the value of the underlying securities. Closed-end funds trade on their market value, not NAV, and closed-end funds often trade at a discount to their NAV.
